Madison 6, Wisconsin

Dear Joshua:

(Anne Marie  
Torreani  
of Howard's  
lab)

Dr. Luigi Gorini of the University of Paris, who has been with us during this year, is planning to take a trip out West soon with Mrs. Gorini, and would like to visit your laboratory about the third of May. They are both exceptionally charming and intelligent people and have been a joy to have as guests. While his English is still not very smooth, he can give a seminar on metal ion interactions with proteins, that presents no difficulty to an interested audience.

I'm sure you would enjoy any time you could spend with them, and I would also recommend him as a seminar speaker if it would be convenient for you to arrange. Since they are here on rather small fellowships an honorarium would be desirable but is certainly not essential.

If this letter seems a little formal it's because it is designed for distribution to others whom I don't know so well.

Best regards *To you & Ellen*

Sincerely,

*Bernard*

Bernard D. Davis
